

INDUSAC – opportunities for companies to receive solutions for technology and business challenges

The [INDUSAC platform](#) provides to companies opportunity to cooperate with international teams of students and researchers from Europe - and many other countries as well - with finding **free of charge solutions to technology and business challenges**.

Challenges can be from any business segment – for example: [defining customer needs of tomorrow](#), [creating marketing campaigns](#), [developing digital platforms](#), [preparing business plan](#), [performing analyses and many more](#) (more details in the attachment). **More than 600 students and researchers checked over 100 published challenges and more than 40 international teams with over 150 members already started with developing solutions to the challenges.**

Participation takes place in the following way:

1. [Register](#) as a company on the INDUSAC platform.
2. **Describe and submit your challenge** on the INDUSAC platform until **15 November 2024**.
3. **Select teams of students and researchers** on the basis of their motivation letters with description of their expertise and skills. Students can apply until 30 January 2025.
4. **The solution is developed in 4-8 weeks** after formal start of the cooperation with the team and you can implement it in your business and/or technology processes afterwards.

Benefits for companies:

1. **The solution is developed free of charge.** The company does not have any financial obligations to the team.
2. Participate with several teams and **receive diverse solutions – select the most appropriate ones.**
3. Connect with **potential future employees.**
4. Additionally increase your **international visibility.**

More information can be found in the [Call for companies](#) and on the [INDUSAC project website](#). In case of any questions you can contact indusac@ijs.si.

International project INDUSAC is coordinated by the [Jožef Stefan Institute](#) (Slovenia).
